

AMPEX FUN KIT #880

You'll have *double* the fun with your Ampex when you use it to make "live" recordings in stereo. Voice, music, in fact *everything* you record will be better in stereo, with far more depth and realism than with monaural recordings.

Have you ever listened to a monaural recording of a roomful of people in conversation? It's just a jumble of voices. But when you record the same thing in stereo, all the sounds are in proper spatial relationship to one another, allowing your ears to use their natural ability to single out individual conversations.

With the Ampex Stereo Fun Kit #880 you'll find it easy to make stereo recordings, with truly professional results. Whether for recording a symphony or a speech, for a band rehearsal or making sound effects and narration to accompany your color slide showing, you should have this Ampex Fun Kit . . . designed to make the most of the unique stereo capabilities of your Ampex recorder.

AMPEX STEREO MICROPHONE KIT #880

AMPEX STEREO FUN KIT #880 CONTAINS:

- Two high-quality Ampex dynamic microphones, omnidirectional, precision-matched for stereo recording. Each is equipped with on-off shorting switch, detachable 8-foot cable, and standard 2-conductor plug. For use with standard $\frac{5}{8}$ " 27-thread mounting on floor stand or desk stand.
- Ampex Stereo-Graph. Provides in convenient easy-to-use graphic form, the basic control settings and directions for over a dozen different recording and playback functions on Ampex Stereo recorders. Incorporates handy playing-time/footage indicator on reverse side.
- "Fun with Ampex Stereo" brochure. Illustrates and describes over two dozen exciting ways to use your Ampex portable or console for games, fun, music and educational pastimes. Includes 6-page how-to-do-it chart section for use with Ampex consoles and component home music systems.

Packed in a handsome, durable container 13" x 20" x 4", matching that for the Ampex 881 kit and suitable for storage when kit is not in use.

Family fun that lasts forever! When you record these happy moments in stereo, they're real. A week, a month, or ten years later, you can re-create the original sound and be carried magically back to the original scene.

They sound twice as good in stereo. When you make musical recordings in stereo, they're truly "live". On playback, every instrument and voice is in its proper place—so real you can feel it!

AMPEX FUN KIT #881

Have you ever found yourself in the mood for a relaxing stereo concert, while the rest of the family wanted to watch TV? It's no problem at all if you have a pair of Ampex Stereo Headsets.

Listening to stereo with binaural headsets provides you with astonishingly effective space and directional effects—so realistic that you quickly forget you're wearing anything on your ears.

A pair of Ampex Stereo Headsets will also provide you with many other kinds of fun. They're indispensable for parties, games, and family get-togethers. In addition, you'll find they make an important contribution to educational uses of the tape recorder, for music, language and vocal instruction.

You're in another world when you listen to stereo on Ampex Headsets. A private concert—just for you—and whether you want jazz, pops or classics, with the volume loud or soft, you won't disturb the family and they won't disturb you!

Learning a new language? An Ampex Stereo Headset makes it easier to concentrate, lets you hear exactly how you sound, and enables you to record your efforts side-by-side with those of the instructor on the master tape... for a direct word-for-word comparison on playback.
